

sympac + Phocas.

Creating a seamless budgeting process!

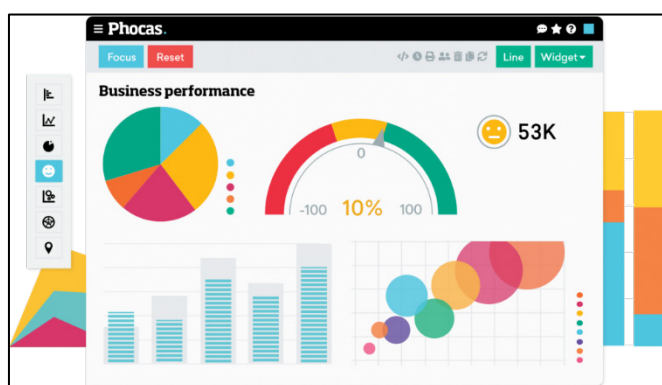

Add intuitive Business Intelligence & Financial Reporting to your Sympac solution. We have partnered with Phocas to add data analytics and financial reporting into your Sympac system. This additional functionality can help you better understand what is important to your business.

more accurate forecasts that adjust as needed based on changing conditions

involving the team with easier access and collaboration for budget contributors

automating the process with changes that become visible to others in real time

integrating other elements of the business to include the true budget drivers such as sales figures, headcount and capital expenditures
